

## Technologies and Innovative Solutions for Energy Efficiency

from	to	Affiliation	Speaker	Title
09:00	09:30	<b>Saluti istituzionali: Salvatore De Pasquale e Giovanni Puglisi</b>		
09:30	09:55	Torino	<i>Marcello Franzini</i>	Synthesis, formulations and application of metal coordination polymers for clean energy production
09:55	10:20	ROMA TV 1	<i>Luigi Vesce</i>	Towards the fully printed perovskite solar technology
10:20	10:45	ENEA 1	<i>Giovanni Landi</i>	Innovative solutions for sustainable energy storage and sensing technologies for indoor monitoring
10:45	11:10	UNISA 1	<i>Carmine Attanasio</i>	Physics of the materials and innovative devices at UNISA Physics Department
11:10	11:40	coffee break		
11:40	12:05	ROMA TV 2	<i>Andrea Reale</i>	Printable thermoelectric devices: from cell to module
12:05	12:30	ENEA 2	<i>Alessandro Lorenzo Palma</i>	Building-level solutions for energy efficiency
12:30	12:55	UNISA 2	<i>Antonio Di Bartolomeo</i>	2D materials for electronic and optoelectronic applications
12:55	13:20	UNISA 3	<i>Maria Sarno</i>	Nanotechnology for enhancing buildings energy performance: from materials to green energy production and storage
13:20	14:20	Lunch
