

IGLO OPEN EVENT

The key role of RTOs in supporting industrial competitiveness in Europe

In an increasingly competitive global market, Research and Technology Organizations (RTOs) play a key role in strengthening Europe's industrial competitiveness. By connecting research and business, RTOs drive innovation, enhance processes, and support the green and digital transition. With insights from Maria Cristina Russo, Director for Prosperity at DG Research and Innovation (EC) and RTOs' representatives, this event will showcase their role in industrial innovation, best practices, future opportunities, and Europe's impact on investments and sustainable growth.
